

Programme Information		
Programme Title	Programme Code	HECoS Code
Genomic Medicine	A3GM	For Registry Use Only

Award	Length of Study	Mode of Study	Entry Point(s)	Total Credits	
				ECTS	CATS
MSc (A3GM / A3GM24)	- 12 months (1 academic year) or - 24 months (2 academic years)	- Full-time - Part-time	Annually in October	90	180
PG Diploma (A3GD8 / A3GD24)	- 8 months or - 24 months (2 academic years)	- Full-time - Part-time	Annually in October	60	120
PG Certificate (A3GC4 / A3GC12)	- 4 months or - 12 months (1 academic year)	- Full-time - Part-time	Annually in October	30	60

You must apply for the qualification you wish to graduate from.

Ownership			
Awarding Institution	Imperial College London	Faculty	Faculty of Medicine
Teaching Institution	Imperial College London	Department	National Heart and Lung Institute
Associateship	Diploma of Imperial College (DIC) (MSc only)	Main Location(s) of Study	Various Locations (including Royal Brompton, Hammersmith and South Kensington)

External Reference			
Relevant QAA Benchmark Statement(s) and/or other external reference points	There is no Master's level subject benchmark statement specifically encompassed by this programme, however, the programme has been designed in line with the requirements of Health Education England, the NHS and Genomics England Ltd.		
FHEQ Level	Level 7		
EHEA Level	2nd Cycle		
External Accrator(s) (if applicable)			
External Accrator 1:	None		
Accreditation received:	N/A	Accreditation renewal:	N/A

Collaborative Provision			
Collaborative partner	Collaboration type	Agreement effective date	Agreement expiry date
Institute of Cancer Research	Collaborative Module Agreement	2015	September 2023
Brunel University London	Collaborative Module Agreement	2016	September 2025
Specification Details			
Programme Lead	Professor Michael Lovett		
Student cohorts covered by specification	2023-24 entry		
Date of introduction of programme	October 15		
Date of programme specification/revision	April 23		

Programme Overview
<p>This clinical Master's level programme will educate students from a wide range of backgrounds (e.g. medicine, nursing, healthcare scientists and technologists) to interpret and understand genomic DNA data that increasingly impacts on service delivery to patients.</p> <p>The aim of the programme is to enhance knowledge and skills in this rapidly evolving field by providing a flexible, multi-disciplinary and multi-professional perspective in genomics as applied to clinical practice and medical research. In so doing, it fulfils the requirements of Genomics England, Health Education England and Public Health England for MSc, PG Dip and PG Cert programmes to transform the NHS workforce in readiness for the 100,000 Genomes Project and subsequent projects, set out in a tender in 2017. Imperial College was successful in its bid to continue to run the programmes and has been designated a preferred provider by Health Education England.</p> <p>The programme comprises core, compulsory and optional taught modules of 7.5 ECTS each that will be taught using a blended approach (direct teaching and online distance learning) to provide flexibility for health professionals to combine their study with NHS and Public Health service duties. The MSc programme also includes a core research project module (30 ECTS).</p> <p>Most modules will consist of one week of face-to face teaching and up to three weeks of e-learning and independent study (exceptions are noted below).</p> <p>The modules are offered on a cycle of 12 months, so that all modules become available once in each 12-month cycle.</p> <p>The programme includes collaborations with the Institute of Cancer Research (providing the core '<i>Molecular Pathology of Cancer and Application in Cancer Diagnosis, Screening and Treatment</i>' module), and Brunel University London (providing the optional '<i>Economic Evaluation in Human Genomics</i>' module). The Institute of Cancer Research and Brunel may also co-supervise research projects.</p> <p>The programme is flexible and modular and includes full- and part-time MSc options, delivered over one or two years respectively. There are also full-time and part-time Postgraduate Certificate (PG Cert) or Postgraduate Diploma (PG Dip) options. If choosing the full-time PG Cert or PG Diploma mode of study students should be aware that module choices will be limited. You will be made aware of their options during the admissions process. Some optional modules may not run if there is not enough demand.</p> <p>Applicants who do not meet the College's normal entry requirements but who have substantial relevant healthcare experience in a related healthcare field may be considered for admission.</p>

Learning Outcomes	
<p>On graduation, you will be able to:</p> <p>PG Cert</p> <ul style="list-style-type: none"> ▪ Critically review and synthesise genomic medicine data from a range of sources; ▪ Communicate core concepts in genomic medicine clearly and effectively with both scientifically-literate and lay audiences; ▪ Evaluate the potential of large-scale patient genome analysis to revolutionise healthcare in at least one domain; ▪ Review and reflect on coursework evaluation, project reports, critical reviews of scientific papers. <p>PG Dip</p> <p>Learning Outcomes for the PG Cert plus:</p> <ul style="list-style-type: none"> ▪ Evaluate the potential of large-scale patient genome analysis to revolutionise healthcare across inherited disease, cancer and infectious disease and its implications in the healthcare setting; ▪ Critically analyse the societal and ethical context of genomic medicine, including the complexities of protecting patient information. This is achieved through a mixture of lectures, debates, role play, review of journal papers/regulations and interaction with patients. ▪ Review and critique the strengths and limitations of techniques suitable for assessing genomic variation relating to different clinical problems and disease states; ▪ Competently analyse and interpret patient genomic analysis results and communicate their implications effectively to the patient. <p>MSc</p> <p>Learning Outcomes for PG Cert and PG Dip plus:</p> <ul style="list-style-type: none"> ▪ Demonstrate synoptic knowledge and deep understanding of medical genomics; ▪ Deploy effective problem-solving strategies in data analysis and experimental design; ▪ Critically evaluate the success, failure and the uncertainty inherent in research through extensive chronological examples from the literature and multiple journal club ▪ Effectively communicate scientific information in both written and oral forms; ▪ Use project management skills in the context of the research project; ▪ Select and deploy suitable research resources and strategies to be able to formulate a research proposal and be able to conduct scientific research. ▪ Synthesise complex research findings into a clear dissertation and oral presentation. 	
<p>The Imperial Graduate Attributes are a set of core competencies which we expect students to achieve through completion of any Imperial College degree programme. The Graduate Attributes are available at: www.imperial.ac.uk/students/academic-support/graduate-attributes</p>	
Entry Requirements	
Academic Requirement	The minimum requirement is normally a 2.1 Bachelor's Degree with in a relevant medical, biomedical or healthcare subject (or a comparable qualification recognised by the College).
Non-academic Requirements	Please refer to Programme Overview section
English Language Requirement	Standard requirement (PG) IELTS score of 6.5 overall (minimum 6.0 in all elements).
Admissions Test/Interview	All short-listed applicants will be interviewed (either in person or via teleconferencing).
<p>The programme's competency standards documents are available from the department.</p>	
Learning & Teaching Approach	
Learning and Teaching Delivery Methods	

In addition to lectures, keynote lectures and seminars, all modules will contain elements of team-based and problem-based learning, journal clubs and e-learning. Content delivery will be by internal and external experts in the relevant fields.

Teaching is inclusive and Blackboard Learn will be used to facilitate module communication and access to all teaching materials, discussion forums and interactive module quizzes. Reading lists, lecture recordings and slides are provided, along with interactive tutorials, lectures and quizzes via platforms such as Sway, Articulate Rise and Blackboard learn.

Most modules consist of one week of synchronous and asynchronous live teaching. Interactive learning tools used to facilitate interaction and group tasks for in-person or online learning. Groups are created to ensure a spread of educational and professional backgrounds to further facilitate student learning opportunities. Journal clubs are facilitated by the module leader and subject matter experts, students are required to work in groups to research, present and answer questions posed by the leaders and other groups.

Laboratory skills will be developed through relevant laboratory teaching and the 14-week research project. In addition, you will be expected to learn independently.

The programme offers laboratory-based, clinically-based, computer-based or literature-based research projects. Examples of research projects:

Wet lab:

“Understanding and evaluating the role of tumour-specific genetic markers for colorectal cancer monitoring”

Dry Lab:

“Network Analysis of Gene Expression during peanut-induced anaphylaxis in humans”

Literature-based:

‘Systematic review and protocol development for personalised upper GI surveillance in Lynch Syndrome’

Overall Workload

Your overall workload consists of face-to-face sessions and independent learning. Your actual contact hours may vary according to the optional modules you choose to study. At Imperial, each ECTS credit taken equates to an expected total study time of 25 hours. All taught Core, Compulsory and Elective modules are 7.5 ECTS. The Research Project Module is 30 ECTS.

Assessment Strategy

Assessment Methods

The main assessment types are coursework and practicals:

- **Coursework:** Deadlines for coursework assessments are usually set for the end of each module.
- **Practicals:** Modules such as *Pharmacogenomics* and *Genome-based Therapeutics* include an oral or poster presentation. The MSc research project also includes an oral presentation to a mixed audience with two internal examiners (Sep).

Research Project: The submission deadline for full-time students is early-September while for part-time students, it is within 12 months.

Academic Feedback Policy

Feedback will be appropriately tailored for the type of assessment and will be provided in a timely manner. The exact turnaround time will depend upon the length and complexity of the submission, but will normally be within two weeks. Where it is longer, students will be told when they may expect to receive their feedback.

The College’s Policy on Academic Feedback and guidance on issuing provisional marks to students is available at:

www.imperial.ac.uk/about/governance/academic-governance/academic-policy/exams-and-assessment/

Re-sit Policy

Students will be permitted to re-enter a failed examination on a single occasion within the same academic year. A failed piece of coursework can be resubmitted on one occasion, following ratification and approval by the Board of Examiners. Re-sitting/re-submitting assessments will normally be capped at the pass mark.

The College's Policy on Re-sits is available at: www.imperial.ac.uk/about/governance/academic-governance/academic-policy/exams-and-assessment/
Mitigating Circumstances Policy
The College's Policy on Mitigating Circumstances is available at: www.imperial.ac.uk/about/governance/academic-governance/academic-policy/exams-and-assessment/

Additional Programme Costs		
This section should outline any additional costs relevant to this programme which are not included in students' tuition fees.		
Description	Mandatory/Optional	Approximate cost
N/A	N/A	N/A

Important notice: The Programme Specifications are the result of a large curriculum and pedagogy reform implemented by the Department and supported by the Learning and Teaching Strategy of Imperial College London. The modules, structure and assessments presented in this Programme Specification are correct at time of publication but might change as a result of student and staff feedback and the introduction of new or innovative approaches to teaching and learning. You will be consulted and notified in a timely manner of any changes to this document.

Programme Structure ¹					
PGCert – FHEQ Level 7 You must study the <i>Fundamentals</i> module and any three further modules listed under PGDip.					
Code	Module Title	Core/ Compulsory/ Elective	Group	Term	Credits
NHLI70039	Fundamentals of Human Genetics and Genomics	Core		Autumn	7.5
Credit Total					30
PGDip - FHEQ Level 7 You must study all six core/compulsory modules and select one Elective A module and one Elective B module.					
Code	Module Title	Core/ Compulsory/ Elective	Group	Term	Credits
NHLI70039	Fundamentals of Human Genetics and Genomics	Core		Autumn	7.5
NHLI70038	Omics Technologies and their Application to Genomic Medicine	Compulsory		Autumn	7.5
NHLI70037	Genomics of Common and Rare Inherited Diseases	Compulsory		Autumn	7.5
NHLI70036	Molecular Pathology of Cancer and Application in Cancer Diagnosis, Screening and Treatment	Core		Spring	7.5
NHLI70040	Application of Genomics in Infectious Disease	Core		Summer	7.5
NHLI70041	Bioinformatics, Quality Control, Analysis and Interpretation of Sequencing Data	Compulsory		Summer	7.5
NHLI70042	Ethical, Legal and Social Issues in Applied Genomics	Elective	A	Spring	7.5
NHLI70043	Genomics and the Patient	Elective	A	Spring	7.5
NHLI70044	Pharmacogenomics and Stratified Medicine	Elective	B	Spring	7.5
NHLI70045	Economic Evaluation in Human Genomics	Elective	B	Spring	7.5
NHLI70046	Genome-Based Therapeutics	Elective	B	Spring	7.5
NHLI70047	Professional and Research Skills	Elective	B	Spring	7.5
Credit Total					60

¹ **Core** modules are those which serve a fundamental role within the curriculum, and for which achievement of the credits for that module is essential for the achievement of the target award. Core modules must therefore be taken and passed in order to achieve that named award. **Compulsory** modules are those which are designated as necessary to be taken as part of the programme syllabus. Compulsory modules can be compensated. **Elective** modules are those which are in the same subject area as the field of study and are offered to students in order to offer an element of choice in the curriculum and from which students are able to select. Elective modules can be compensated.

MSc - FHEQ Level 7

You must study all core/compulsory taught modules, select one Elective A module and one Elective B module.

Code	Module Title	Core/ Compulsory/ Elective	Group	Term	Credits
NHLI70039	Fundamentals of Human Genetics and Genomics	Core		Autumn	7.5
NHLI70038	Omics Technologies and their Application to Genomic Medicine	Compulsory		Autumn	7.5
NHLI70037	Genomics of Common and Rare Inherited Diseases	Compulsory		Autumn	7.5
NHLI70036	Molecular Pathology of Cancer and Application in Cancer Diagnosis, Screening and Treatment	Core		Spring	7.5
NHLI70040	Application of Genomics in Infectious Disease	Core		Summer	7.5
NHLI70041	Bioinformatics, Quality Control, Analysis and Interpretation of Sequencing Data	Compulsory		Summer	7.5
NHLI70042	Ethical, Legal and Social Issues in Applied Genomics	Elective	A	Spring	7.5
NHLI70043	Genomics and the Patient	Elective	A	Spring	7.5
NHLI70044	Pharmacogenomics and Stratified Medicine	Elective	B	Spring	7.5
NHLI70045	Economic Evaluation in Human Genomics	Elective	B	Spring	7.5
NHLI70046	Genome-Based Therapeutics	Elective	B	Spring	7.5
NHLI70047	Professional and Research Skills	Elective	B	Spring	7.5
NHLI70048	MSc Genomic Medicine Research Project	Core		Autumn-Summer	30
Credit Total					90

Award of a Postgraduate Certificate (PG Cert)

To qualify for the award of a postgraduate certificate you must have a minimum of 30 credits at Level 7.

Award of a Postgraduate Diploma (PG Dip)

To qualify for the award of a postgraduate diploma you must have passed modules to the value of no fewer than 60 credits at Level 7:

1. and no more than 10 credits as a Compensated Pass;

Award of a Masters Degree (MSc)

To qualify for the award of a postgraduate degree you must have:

1. accumulated credit to the value of no fewer than 90 credits at level 7;
2. and no more than 15 credits as a Compensated Pass;
3. met any specific requirements for an award as outlined in the approved programme specification for that award.

Classification of Postgraduate Taught Awards

The College sets the class of Degree that may be awarded as follows:

1. Distinction: 70.00% or above
2. Merit: 60.00% or above but less than 70.00%.
3. Pass: 50.00% or above but less than 60.00%.

For a Masters, your classification will be determined through:

- The Programme Overall Weighted Average and the designated dissertation or final major project module meeting the threshold for the relevant classification band.

Your degree algorithm provides an appropriate and reliable summary of your performance against the programme learning outcomes. It reflects the design, delivery, and structure of your programme without unduly over-emphasising particular aspects.

Programme Specific Regulations

Rules for progression

All students must pass a zero weighted, not for credit, on-line Genomic Medicine Primer course. Students enrolled on the PG Cert who wish to continue on the programme without a break can transfer to the PG Dip after completing the Fundamentals module and two other modules, provided they have demonstrated satisfactory academic progress in their first three modules. Similarly, students enrolled on the PG Dip can transfer to the MSc after completing two further modules, provided they have demonstrated satisfactory academic progress. In these cases, progression to the upper degree will depend on ratification by an interim meeting of the Exam Board.

Students who register for and successfully complete the PG Cert may use the credit gained towards registration for the PG Dip or the MSc at a later point, provided that the PG Dip is completed within 4 years and the MSc is completed within 5 years, of initial registration for the Postgraduate Certificate. These students may be asked to surrender the associated PG Cert and/or PG Diploma on registration for the higher award.

Likewise, students who register for and successfully complete the PG Dip may use the credit gained towards the MSc, provided that the MSc is completed within 5 years of their initial registration of the lowest award. These students may be asked to surrender the associated PG Dip on registration for the MSc.

Students who register for the MSc in the first instance will have a "virtual" PG Cert confirmed if the requirements for the PG Cert have been met. The pass mark for the PG Cert will be carried forward and the credits will accumulate towards the next level. On successful completion of eight modules (six Core/Compulsory, one Elective A and one Elective B), students will have a "virtual" PG Dip. The

pass mark will be carried forward and the credits will accumulate towards the MSc. Should these students subsequently fail to achieve the requirements for the MSc they will be awarded the PG Dip.

Supporting Information

The Programme Handbook is available on Blackboard.

Module information can be found available within the programme handbook on Blackboard.

The College's entry requirements for postgraduate programmes can be found at:
www.imperial.ac.uk/study/apply/postgraduate-taught/entry-requirements/accepted-qualifications/

The College's Quality & Enhancement Framework is available at:
www.imperial.ac.uk/registry/proceduresandregulations/qualityassurance

The College's Academic and Examination Regulations can be found at:
www.imperial.ac.uk/about/governance/academic-governance/regulations

Imperial College is an independent corporation whose legal status derives from a Royal Charter granted under Letters Patent in 1907. In 2007 a Supplemental Charter and Statutes was granted by HM Queen Elizabeth II. This Supplemental Charter, which came into force on the date of the College's Centenary, 8th July 2007, established the College as a University with the name and style of "The Imperial College of Science, Technology and Medicine".
