IMPERIAL

Department of Chemical Engineering

World-leading department for research and student experience in chemical engineering

RESEARCH THEMES

Biomedical engineering and industrial biotechnology
Engineering biological and biomedical systems to improve human health, and the world around us.

Energy and environmental engineering
Delivering materials, methods, processes and technologies in support of a sustainable future

Materials
Making materials matter: understanding the behaviour of materials for optimising technological processes and product applications

Multiphase transport processes
Creating the next generation of multi-scale modelling tools and measurement techniques for complex multiphase flows

Multi-scale computational chemical engineering
Computational and systems approaches for the analysis, design and optimisation of chemical, physical and biological processes across length and time scales

Separations
Developing energy efficient separations across a range of industrial applications

Reaction engineering and applied catalysis
Developing novel, clean and efficient chemical processes while minimising negative impacts on the world and its resources

Multi-scale computational thermodynamics and molecular systems
Quantative prediction of the thermophysical properties and phase behaviour of matter to provide insight into its behaviour

Soft matter engineering
Designing, synthesising, assembling, characterising and modelling soft materials for applications ranging from healthcare to energy

ACADEMIC STAFF

Professor Claire Adjiman
Professor of Chemical Engineering

Professor João Cabral
Professor of Soft Matter

Dr Francesca Ceroni
Senior Lecturer in Synthetic Biology

Professor Benoit Chachuat
Professor of Process Systems Engineering

Professor David Chadwick
Professor of Applied Catalysis

Dr Antonio Del Rio Chanona
Senior Lecturer in Chemical Engineering

Professor Rongjun Chen
Professor of Biomaterial Engineering

Dr Yuval Elani
Reader in Biochemical Technologies

Dr Salvador Eslava
Reader in Applied Energy Materials

Professor Paul Fennell
Professor of Clean Energy

Professor Amparo Galindo
Professor of Physical Chemistry

Professor Jason Hallett
Professor of Sustainable Chemical Technology

Dr Ceri Hammond
Reader in Chemical Engineering

Dr Anna Hankin
Senior Lecturer in Chemical Engineering

Professor Adam Hawkes
Professor of Energy Systems

Professor Klaus Hellgardt
Professor of Chemical Engineering

Professor Jerry Heng
Professor of Particle Technology

Professor George Jackson
Professor of Chemical Physics

Professor Sergei Kazarian
Professor of Physical Chemistry

Professor Serafim Kalliadasis
Professor Engineering Science & Applied Mathematics

Professor Cleo Kontoravdi
Professor of Biological Systems Engineering

Dr J Krishnan
Reader in Biological & Chemical Information Processing Systems

Professor Kang Li
Professor of Chemical Engineering

Professor Paul Luckham
Professor of Particle Technology

Professor Sandro Macchietto
Professor of Process Systems Engineering

Professor Geoff Maitland
Professor of Energy Engineering

Professor Christos Markides
Professor of Clean Energy Technologies

Professor Omar Matar
Head of Chemical Engineering

Dr Mehmet Mercangöz
ABB Reader in Autonomous Industrial Systems

Dr Marcos Millan-Agorio
Reader in Chemical Engineering

Professor Erich Muller
Professor of Thermodynamics

Professor Constantinos Pantelides
Professor of Chemical Engineering

Dr Maria Papathanasiou
Senior Lecturer in Life Science Systems Engineering

Professor Camille Petit
Professor of Materials Engineering

Professor Ronny Pini
Professor in Chemical Engineering

Professor Karen Polizzi
Professor of Biotechnology

Dr Roberto Rinaldi
Reader in Applied Chemistry

Professor Nilay Shah
Professor of Process Systems Engineering

Dr Qilei Song
Reader in Chemical Engineering

Dr Chris Tighe
Senior Lecturer in Chemical Engineering

Professor Magda Titirici
Professor of Sustainable Energy Materials

Professor Martin Trusler
Professor of Thermophysics

Professor Daryl Williams
Professor of Particle Science

Professor Yun Xu
Professor of Biofluid Mechanics

Dr Ali Yetisen
Senior Lecturer in Chemical Engineering

STUDY AT IMPERIAL

Undergraduate courses

MEng Chemical Engineering

MEng Chemical Engineering with a year abroad

Postgraduate courses

PhD in Chemical Engineering

MSc in Advanced Chemical Engineering

MSc in Advanced Chemical Engineering with Biotechnology

MSc in Advanced Chemical Engineering with Process Systems Engineering

Our mission is to deliver world-leading research, education, leadership and inspiration in chemical engineering, on a micro and macro scale, locally, nationally and globally.
