Date of introduction of programme	October 18		
Date of programme specification/revision	August 24		

Programme Overview

The MSc in Business Analytics (online) is a part-time programme that is delivered in a distance learning format. The programme goal is to enable graduates to understand the challenge of managing large data sets, analyse them to gain insights for a firm, and to provide them with a skill set to meet this challenge. The programme combines academic rigour and practical relevance. There is a careful balance of teaching and learning, individual and group work. Large data sets, programming skills, hands-on coursework and discussions (via the VLE) are used to strengthen the conceptual, analytical and problem-solving skills of the participants in real situations. The programme prepares graduates for a future of data driven and evidence-based decision making. You will learn how to apply the latest academic thinking and analytical and computing tools to help make business decisions, from leading practitioners and world-class faculty.

The programme is designed to be able to be completed within 24 months, but has an extended 36 month option to allow you to complete the programme at your own pace. Initial enrolment is on the full MSc programme, however it is recognised that circumstances may change for part-time students and exit points are offered upon completion of 30 ECTS (PG Certificate) or 60 ECTS (PG Diploma). You must successfully complete all 6 compulsory modules to be eligible for the PG Certificate exit award, and an additional 6 elective modules for the PG Diploma award. The maximum period of registration for either exit award is 36 months.

Although grounded in rigorous technical and quantitative training, the programme is also highly applied. Electives and projects are sector-focussed, giving you the opportunity to tailor the programme to your interests.

The programme comprises 6 compulsory modules, and a choice of 9 elective modules from a range of subject areas. These modules are taught over a minimum of 24 calendar months. During the final 3 months, you will complete the Analytics in Business Capstone Project (Analytics Project), Analytics in Business Project (Workbased Project) or an Individual Research Report. It may be possible for projects to be carried out partly or wholly at an external organisation and requests will be considered on a case by case basis.

*students choosing to leave the programme at either exit award points, may have the opportunity to re-enter the programme at a later date, but should be aware that maximum periods of registration apply.

Learning Outcomes

Upon successful completion of the postgraduate certificate, you will be able to:

- Comprehend the foundational mathematical and statistical concepts behind data and business analytics.
- Create and manipulate and visualize data.
- Develop skills to use modelling, optimisation and machine learning to critically analyse data.
- Develop programming skills and the ability to "data wrangle" and visualise data. Understand and implement some commonly used data structures.
- Develop intellectual, cognitive and transferable skills such as communication and analysis of data, theory and evidence.
- Apply innovative and creative thinking and problem-solving skills to complex, ambiguous, uncertain, and systemic problems. Explore, define and reframe problems, and generate solutions or alternative approaches for existing ones.

Upon successful completion of the postgraduate diploma, you will additionally be able to:

- Demonstrate understanding of industry-specific datasets, business analytical questions and use data and analytical tools to answer questions.
- Deepen methodological knowledge of business analytical tools.

Upon completion of the Master's award, you will additionally be able to:

- Demonstrate ability to develop projects and present findings based on data.
- Do independent research and literature search and write a comprehensive analytics report.

The Imperial Graduate Attributes are a set of core competencies which we expect students to achieve through completion of any Imperial degree programme. The Graduate Attributes are available at: https://www.imperial.ac.uk/about/education/our-graduates/

Entry Requirements	
	Normally an Upper Second Class Honours Degree with Honours (or international equivalent) in a quantitative discipline such as:
	Mathematics Statistics
	Computer science
	Engineering
	Physics
	A quantitative economics degree
Academic Requirement	However, we may consider candidates applying with non-traditional qualifications and backgrounds, on the basis of highly relevant work experience or demonstrated interest. If a less quantitative degree background we advise the GMAT or GRE test to demonstrate quantitative ability.
	The Business School does not award credit for Prior Learning (Recognition of Prior Certified Learning (RPCL) or Recognition of Prior Experiential Learning (RPEL)).
Non-academic Requirements	Personal Statement CV Two referees Career Planning Questions
English Language Requirement	Higher requirement IELTS score of 7.0 overall (minimum 6.5 in all elements).
Admissions Test/Interview	You are required to take an online interview via the Kira Talent platform. All interviews are reviewed and scored as part of the Admissions process.
The programme's competency standa	ards documents can be requested from the Education Quality team.
Learning & Teaching Approach	

Learning and Teaching Delivery Methods

The programme combines academic rigour and practical relevance. There is a careful balance of teaching and learning, individual and group work.

Independent learning

You are expected to spend significant time on independent study outside of directed learning time on the HUB. This will typically include accessing resources online, reading journal articles and books, undertaking research in the library, reviewing lecture notes and watching lecture recordings, working on individual and group projects, working on coursework assignments and revising for exams.

Active Learning

Projects

All students are required to undertake the Analytics in Business Capstone project (either Analytics Project or Work-based Project) as the final summative piece of their degree or an Individual Research Report for those wishing to pursue further academic study.

Overall Workload

Your overall workload consists of directed online learning sessions and independent learning. While your actual contact hours may vary according to the elective modules you choose to study, the following gives an indication of how much time you will need to allocate to different activities at each level of the programme. At Imperial, each ECTS credit taken equates to an expected total study time of 25 hours. Therefore, the expected total study time is 1125 hours per year.

On average during the two years of the programme, you are expected to spend around 20% of your time on directed learning, 70% on independent study and group work, 5% on careers and personal development and 5% of their time on other activities (e.g. social, leisure clubs). There are typically 80 students per cohort on the programme and group work is normally conducted in syndicate teams of 3-6 students

Assessment Strategy

Assessment Methods

Modules will be assessed by one or more of the following types of assessment methods:

- Essays
- Continuous assessments
- Written Examinations/Tests
- Multiple Choice Tests
- Formal Presentations
- Video Presentations
- Reports
- Simulations
- Case Studies
- Class Participation

Assessed modules comprise coursework that is designed to help you master key elements of the subject and, in part, to help prepare you for the final assessment, which is typically a report or examination. Examinations are scheduled throughout the year, generally at the end of the term the module is taught or at the start of the subsequent term. Exact timings are detailed in the programme overview section above. The format of examinations may be written, computer-based or timed remote assessment.

Coursework weighting varies among modules. The various assessments allow you to demonstrate that you have met the intended learning outcomes for each module and these collectively contribute towards your achievement of the programme's learning outcomes, detailed above.

Assessments are designed to ensure that you have acquired the core knowledge and skills expected of a Business School graduate and that you are able to apply these in your career aspirations upon completion of the programme.

Balance of assessment

Compulsory (core) modules

Coursework 65% Exam - 35%

Electives

Coursework - 100%

Academic Feedback Policy

Feedback can take many forms. During lectures and classes, you will receive verbal feedback on the ideas that you contribute to discussions and on in-class presentations. The online teaching materials contain exercises with built-in, immediate, feedback that is received when you submit an answer.

The Business School aims to provide feedback on coursework within two weeks. This will be sent in written form to the individual or the group, as appropriate. Academic staff may also provide verbal feedback of a general nature in class or posted to our virtual learning environment. Office hours offered on all modules also provide an opportunity for individual feedback.

The Business School aims to provide provisional examination grades twenty-five days from the end of the examination period. General feedback to the cohort is provided on examination performance, usually in written form. If you need to resit an examination, you may also approach the module leader for feedback on your performance in the first sitting.

You will be provided with a percentage grade for coursework and examinations with the final numerical mark only confirmed after the Board of Examiners Meeting and then released by Registry. Grades received during the year are deemed provisional until confirmed by the Final Board of Examiners.

Imperial's Policy on Academic Feedback and guidance on issuing provisional marks to students is available at: www.imperial.ac.uk/about/governance/academic-governance/academic-governance/academic-policy/exams-and-assessment/

Re-sit Policy

Imperial's Policy on Re-sits is available at: www.imperial.ac.uk/about/governance/academic-governance/academic-policy/exams-and-assessment/

Mitigating Circumstances Policy

Imperial's Policy on Mitigating Circumstances is available at: www.imperial.ac.uk/about/governance/academic-policy/exams-and-assessment/

Additional Programme Costs

This section should outline any additional costs relevant to this programme which are not included in students' tuition fees.

Description	Mandatory/Optional	Approximate cost
On Campus week, July First Year	Mandatory	Own housing and travel

Important notice: The Programme Specifications are the result of a large curriculum and pedagogy reform implemented by the Department and supported by the Learning and Teaching Strategy of Imperial College London. The modules, structure and assessments presented in this Programme Specification are correct at time of publication but might change as a result of student and staff feedback and the introduction of new or innovative approaches to teaching and learning. You will be consulted and notified in a timely manner of any changes to this document.

Programme Structure¹

Year 1 – FHEQ Level 7
You will study all compulsory modules. You must select 15 or 20 ECTS of electives in year 1.

Code	Module Title	Core/ Compulsory Elective/	Group	Term	Credits
BUSI70201	Essentials of Maths, Stats and Finance for Analytics	Compulsory		AU	5
BUSI70216	Maths and Statistics Foundations for Analytics	Compulsory		AU	5
BUSI70207	Data Structures and Algorithms	Compulsory		AU	5
BUSI70218	Optimisation & Decision Models	Compulsory		SP	5
BUSI70220	Statistics & Econometrics	Compulsory		SP	5
BUSI70215	Machine Learning	Compulsory		SU	5
BUSI70211	Fundamentals of Database Technologies	Elective		SU	5
BUSI70217	Network Analytics	Elective		SP	5
BUSI70445	Decision Analytics	Elective		SP	5
BUSI70189	Data Analytics and Visualisations for Business	Elective		SU	5
BUSI70222	Workforce Analytics (suspended for 2024-25)	Elective		SU	5
BUSI70455	Leadership in Analytics	Elective		SU	5
BUSI70571	Generative AI and Large Language Models	Elective		SU	5
Credit Total					45

Year 2 - FHEQ Level 7

You must select 25 or 30 ECTS of electives plus either the Analytics Project, Work-based Project or Individual Research Report.²

Code	Module Title	Core/ Compulsory Elective/	Group	Term	Credits
BUSI70211	Fundamentals of Database Technologies	Elective		SU	5
BUSI70217	Network Analytics	Elective		SP	5
BUSI70445	Decision Analytics	Elective		SP	5

¹ **Core** modules are those which serve a fundamental role within the curriculum, and for which achievement of the credits for that module is essential for the achievement of the target award. Core modules must therefore be taken and passed in order to achieve that named award. **Compulsory** modules are those which are designated as necessary to be taken as part of the programme syllabus. Compulsory modules can be compensated. **Elective** modules are those which are in the same subject area as the field of study and are offered to students in order to offer an element of choice in the curriculum and from which students are able to select. Elective modules can be compensated.

² The two Analytics in Business Capstone Project modules are graded pass/fail and zero weighted. If passed, the ECTS gained will count towards those required to achieve the target award, but performance in this module will not further affect the degree classification.

BUSI70472	Data Analytics and Visualisation for Business	Elective	SU	5
BUSI70455	Leadership in Analytics	Elective	SU	5
BUSI70571	Generative AI and Large Language Models	Elective	SU	5
BUSI70214	Logistics & Supply Chain Analytics	Elective	AU	5
BUSI70212	Healthcare & Medical Analytics	Elective	SU	5
BUSI70209	Energy Analytics	Elective	SP	5
BUSI70208	Digital Marketing Analytics	Elective	SU	5
BUSI70219	Retail & Marketing Analytics	Elective	SP	5
BUSI70204	Advanced Machine Learning	Elective	AU	5
BUSI70061	Market Research (suspended for 2024-25)	Elective	SP	5
BUSI70081	Strategic Market Management	Elective	AU	5
BUSI70343	Business Problem Solving	Elective	AU	5
BUSI70035	Emerging Technologies in Marketing (suspended for 2024-25)	Elective	SU	5
BUSI70210	Financial Analytics	Elective	SU	5
BUSI70206	Analytics in Business Capstone Project (Analytics Project)	Elective	SU	15
BUSI70440	Analytics in Business Capstone Project (Workbased Project)	Elective	SU	15
BUSI70213	Individual Research Report	Elective	SU	15
			Credit Total	45- 47.5

Progression and Classification

Award and Classification for Postgraduate Students

Award of a Postgraduate Degree (including MRes)

To qualify for the award of a postgraduate degree a student must have:

- 1. accumulated credit to the value of no fewer than 90 credits at level 7
- 2. and no more than 15 credits as a Compensated Pass;

Exit Awards:

Award of a Postgraduate Certificate (PG Cert)

To qualify for the award of a postgraduate certificate you must have a minimum of 30 credits at Level 7 (this may include a maximum of 10 credits from Level 6 where this is approved as part of the award).

Award of a Postgraduate Diploma (PG Dip)

To qualify for the award of a postgraduate diploma you must have passed modules to the value of no fewer than 60 credits at Level 7 (this may include a maximum of 15 credits from Level 6 where this is approved as part of the award).

1. and no more than 10 credits as a Compensated Pass;

Classification of Postgraduate Taught Awards

The university sets the class of Degree that may be awarded as follows:

- 1. Distinction: 70.00% or above.
- 2. Merit: 60.00% or above but less than 70.00%.
- 3. Pass: 50.00% or above but less than 60.00%.

For a Masters, your classification will be determined through the Programme Overall Weighted Average meeting the threshold for the relevant classification band.

Your degree algorithm provides an appropriate and reliable summary of your performance against the programme learning outcomes. It reflects the design, delivery, and structure of your programme without unduly overemphasising particular aspects.
