# A sustainable future

As an academic venue, we adopt Imperial College London’s campus-wide environmental policy, driven by a bold vision to create a sustainable, zero-pollution future.

**Corporate social responsibility:** All profits generated from our clients are invested back into the College to support education and research.

**Out of steam:** Removal and replacement of the old steam heating and hot water network from our South Kensington campus in August 2024 is expected to reduce CO<sub>2</sub> emissions by more than 2,400 tonnes per annum.

**Dairy-free alternatives:** We provide non-dairy alternatives for catering orders at no additional charge.

**Eliminating single-use cups:** We have taken a firm stance against single-use plastic cups by removing them from our drink stations. This has already saved 850,000 cups per year from ending up in landfill.

**Our journey to net zero:** We have committed to becoming a net-zero institution by 2024. Read more about our commitment to sustainability.
